Register a free business account There are a variety of applicators available to match the needs of your manufacturing process. Manual hand motion drives the dual pistons directly into the DuoPak cartridge, applying equal pressure and feeding the two components of the adhesive directly into the mixing nozzle sold separately. These manual applicators offer takeittothe job convenience no air hoses or electrical cords necessary. Other advantages include improved mixing ratio accuracy with no hand mixing required and efficient use of adhesive. In the end, their technologies help customers like you deliver competitive products to the market faster and more efficiently. The EPX Plus II Applicator is used to dispense 3M ScotchWeld adhesives in duopak cartridges. The applicator is a lowcost portable, self contained metering, mixing and dispensing machine that simultaneously meters and mixes twopart adhesives as the material is applied. Learn More Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. ParaPilot 5.0 out of 5 stars It has different plungers for different mix ratios and marries up with the mixer nozzles you fit on the front of the cartridge. It is easy to get the cartridges in and out, it is decent quality and easy to control the glue flow. Pretty pricey but I havent seen any nongenuine or aftermarket guns that work with 3M mixer cartridges so it is a must have for their glues. http://www.wederopbouw.be/_files/crown-xs900-power-amp-manual.xml

- **3m epx plus ii manual applicator, 3m scotch-weld epx plus ii manual applicator, 3m epx plus manual applicator, 3m epx plus manual applicator instructions, 3m epx plus manual applicator review, 3m epx plus manual applicator online, 3m epx plus manual applicator kit, 3m epx plus ii manual applicator.**

Based on pictures on the net I figured this would work equally well with the 3M made BoronNitride twocomponent epoxy. I was right, it fit perfectly and with the mixer nozzle attached it did the job just fine. Cleverly made, easy to use. My only issue is the price, but I looked at the epoxy before I bought this applicator and figured I could not mix it without it. The price amazon had was the most attractive after looking around at various retailers. Shipping from amazon is also super fast, usually I get the items in the mail in 2 days from the time of order. There is no way to accurately measure a 2 part epoxy or adhesive without one of these. They are a little pricey, but it should last for a very long time. I thought Id try it out though, and ended up buying one for my home use. The advantage to using this is that the two components are metered out precise enough that I noticed a difference in the quality of the adhesive cure when compared to hand measured. The adhesive never had a slight tack to it after cure when using this tool. The other advantage is that you can use mixing nozzles, which makes injecting mixed adhesive a breeze. Works well although sometimes the tube can slip out of the clip on top which is a bit of a pain and perhaps needed to be made out of metal or a bit sturdier. I think it is actually the a tube that deforms allowing it to push out. It will allow the correct cartridge to mix the epoxy perfectly, no guess work. The tips allow the epoxy to be applied to a precise location, perfect for what I use it for. Its well made and works great, a quality product from 3M. Please try again. Please try again. This 3M personal protective equipment Misuse of personal protective equipment may For correct product selection and use, Over the years he's learned what it takes to satisfy a customer. Which, sometimes means going the extra mile literally. In the early 1990s, on a hot summer day in Columbus, OH, Art, then an employee of a local packaging supply company, received a call from a customer who had run out of packaging peanuts and therefore, were unable to ship any orders. With stock located over 100 miles away, his customer was facing a shut down situation. Art recognized the impact this could have on his customer and went to work exploring any and all options. Stock could be delivered the next day, but that wasn't good enough. Art decided to purchase some product from a local competitor and strapped it onto the top of his car. He recalls driving about 25 mph on back roads to his customer's location. Needless to say his customer was extremely happy and was shipping packages with almost no downtime. Art on right going the extra mile for his customer. Art has instilled these same values in everyone here at PacknTape and our everyday activities. You can rest assured our experts will work to understand your business's priorities and processes to ensure you get the products you need, when you need them. With extra lead time and direct access to the latest and greatest in 3M products and pricing, we are poised to help you keep your business on the cutting edge. Understanding We have dedicated 3M Strategic Account Specialists on our team, ready to provide personalized solutions for even your toughest applications. Our Specialists receive specialized product training at 3M headquarters and work closely with 3M's local product specialists.

Our entire sales staff has access to online and fieldbased training as well as enhanced product information. These resources give us an understanding of 3M product solutions you won't find

anywhere else. Our onsite expert works to understand your business's priorities and processes, so you get the solutions you need, when you need them. Confidence In order to partner with 3M as a Strategic Distributor, PacknTape has demonstrated our company's strength and our commitment to providing ongoing support to our customers. We are dedicated to bringing you value for the long haul. When product is available, ground orders typically ship after a 3 business day warehouse processing time.
