Egy barátom megkért, hogy talájak vagy gyartsak egy tapegyseget a Bose dokkolojához. Sajnos az eredetiket aranyarban adjak, így gyartanom kell egyet. Talátam is egy elegans kis 4 pines csatit, de fennakadtam az eredeti csatlakozó labkiosztasan. Találtam egy rajzot de nem tudom eldönteni, hogy

a kábelen levőt ábrázolja, vagy a dokkolóban levő. Ha valakinek dolga volt ilyennel, és tudna segíteni, kérem ne tartsa vissza magát. Köszönöm.. Bose Lifestyle CD20 FLC kijelző halvány Sziasztok! A fenti készüléknek halvány a kijelzése. Eleg érdekesebben van megoldva a kijelző tapfeszése, sokban függ a bejövő 12VAC feszültségtől. Kérdésem az lenne, hogy a fűtést próbáljam emelni, vagy a 24Vot. A D8on a 30V is kevesebb, de az AC 4.5V is. Melyik befolyásolja jobban a fényerőt. A fűtés, vagy a negatív tapfeszés Basszus végfoka 23mp múlva megfűt vagy pozitívba vagy negatívba ha nincs a hangszóró rarakva, hangszóróval azonnal letilt, amikor a kimeneten eljut DC 4Vig a védelem lekapcsolja relevel az érosítót. Mikor a MUTE hibát kerestem, volt olyan eset is, hogy nem futott meg a kimenet és szűlt a basszus rendesen, de újbóli bekapcsoláskor ha nem hálkítottam le a potit akkor kikapcsolt a relé, ha lehálkítottam akkor jó lett, de nagyon susogott, arra hasonlított mint amikor FM rádió nincs az állomáson, van egy közös mute tranzisztor az kapcsolja az összes többi, ha azt kiszedtem akkor is megmaradt a susogás, szerintem visszafelé jött valamelyik oldalról ezért szedtem ki mindegyik oldalról a tranzisztorokat, nem akartam bajlódni vele, hogy honnet jön a susogás vissza. Mi lehet a gond BOSE bekötési rajz Legyszi legyszi ha valaki tudnasegíteni egy BOSE AMP2440as érosító bekötésében, azt nagyon szépen megköszönöm. Ez AUDI A3asból van, a steker nincs meg. ZooMama 5.0 out of 5 stars This model is no longer made and I had no interest in the newer multi cd versions because of the stories of cds getting stuck, plus they're bulkier. I like this sleek low profile design. The seller shipped it promptly and it was excellently packaged to prevent damage. The unit was clean, and remote, cable, and battery for the remote were included as advertised. This is an older piece but it is classic Bose it never goes out of style.

The sound is amazing, the clock lights dim so they're not so bright at night something other alarm clocks I've had don't do and brighten when you adjust the volume or change the alarm time. Two alarm settings allow for a back up, always a plus for heavy sleepers and those like me who need MANY snoozes. Choose between mellow alarm beeps or any radio station from your preset to wake you up with a gradually increasing volume to about 57. That is probably my favorite feature instead of the jarring loud alarm, it gently wakes you up with gradually increasing volume. The CD player is under the control panel a gentle push opens and closes it. The sound, it's Bose so it's Perfect. Well worth the wait and the money. This unit can reach concert hall level sound depending on room size and acoustics. As for the one person who says that it does not read mp3 cds. It does. The book does say that it depends on how it was recorded which is commonplace with any cd. And to the one person that said that there are no bass and treble controls. You don't need them. The sound is so

perfectly well balanced on its own. The book does mention that placement is very important to sound quality. Like in a corner increases the bass and more towards the edge of a shelf decreases bass etc. I bought mine used because I'm not sure if it is worth over 1000.00 dollars for a new one. I have a Bose sound dock 10on which cost me around 600.00 dollars at a best buy and it can also achieve concert level sound. Overall I just used it for one day and so far am totally blown away by the sound. Tony D. The seller was wonderful to work with. There was some confusion after the order was placed, because the picture as is here displayed was NOT the one I saw before I ordered. I had spent months reading details of several models, reading reviews, reviewing info about sellers, etc. I was shocked when this image showed up, as I had tried to ordering according to the text displayed with it, and a different seller.

I did contact the seller and we each shared our details about the model I received and the image here, which DID not match the text. The confusion was resolved and I've been very happy with the product. Would highly recommend this product and seller. It only plays one CD at a time, but that works for me. I have all my favorite radio stations programmed in and can switch to them at the touch of a button. I am VERY happy I purchased this unit from this seller, and will consider them again if we decide to purchase another unit for a different area of our home. I was so excited when I found the used ones on Amazon. The product arrived in PERFECT condition, it looks and plays like new, and I am THRILLED with it!! It is exactly what I was hoping for. I didn't rate the remote control because the unit doesn't come with one. I highly recommend this product and the seller!! Thank you for such a great job! Julie The item was described as in very good condition, as it was used. Unfortunately this was by far not the case. The music system was dirty and dusty all around and I had to clean it inside out. For a regular internet seller I would have expected that they would go over the selling item and at least have the courtesy to remove dirty finger prints. The rating therefore goes to the seller, the item as such is fine. Always wanted one and it's great creating paintings and listening to what I want to play.
